Technology:

Myclass - Information regarding your course content, zoom meetings, and course expectations will be available on the Myclass course homepages.

GPRC Email - Each student is provided with a unique GPRC email address. Please ensure you are checking your email regularly. You can check your email by visiting the GPRC website (<https://www.gprc.ab.ca/>) and clicking on the Webmail icon in the top righthand corner. Alternatively, you can utilize outlook to access your account.

GPRC will be using a Blended Delivery option for the 2020/2021 Academic Year:

You should be able to log into both **webmail** and **myClass** now.

Please use the following information:

Username: [your student ID number]@student.gprc.ab.ca

Password: [your birthdate in format YYYYMMDD (for example: 1674Feb09)]

For **myClass**, we have had best luck with using Microsoft Edge and Chrome.

Remote Delivery:

Within the Heavy Equipment Department, the 2021 Spring Semester all theory will be conducted through remote delivery. Remote delivery refers to synchronous learning following the published timetable. Please ensure you are available for all your scheduled class times as Instructors will be reviewing attendance and may have participation marks attached to your attendance and participation in Zoom meetings.

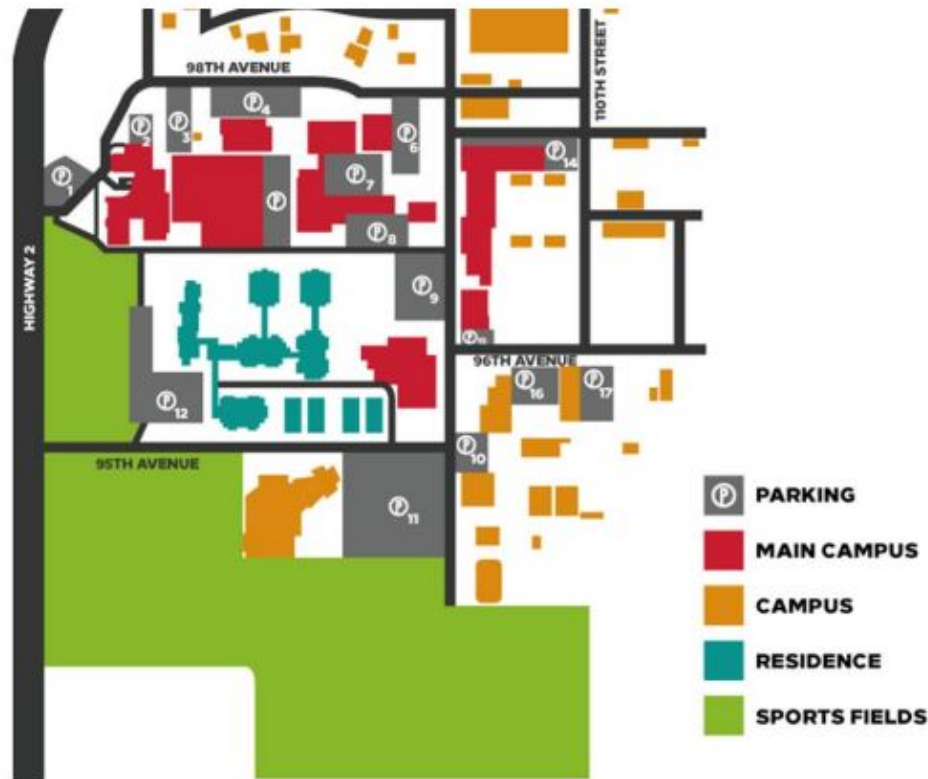

Shop Delivery:

Within the Heavy Equipment Department, the 2021 Spring Semester all shop will be conducted through on-site shop delivery. Shop delivery refers to onsite hands on for all lab components. Students must adhere to all GPRC safety protocol as published on the website.

Zoom Etiquette 101*

Control video and audio quality - Invest in a quality webcam and speaker and microphone headset. These provide better video and audio than your computer's built-in system. Try to attend Zoom meetings in quiet, indoor locations to control ambient noise.

Adjust your lighting - Don't sit directly in front or beside a bright light source, or else all the audience sees is a bright light and a shadowy figure. Experiment with moving lamps and your camera until you can see your brightly lit face on the screen.

Think about your background - Try to provide a nice, plain background. You can't control everything in a mobile environment, but you should give some thought to background prior to your meeting.

Practice speaking to the camera and not the screen - Our tendency is to look at the person on the screen, but you should look at the camera when you speak so the audience feels like you're talking directly to them.

Optimize Zoom - Generally, DO NOT select "Share Your Desktop" (unless you want every pop-up email and private message on display for your audience!). Instead, open any relevant documents before the call and share only those during the meeting. Bandwidth and signal.

Insure you have adequate bandwidth - If you are wireless, try to remain close to the wireless router and consider installing a signal booster in areas of low signal strength. When you have the option choose wired (instead of wireless) for video conferencing.

During your meeting - Mute your microphone when necessary. Zoom has a "Mute Microphone" option that cuts down on ambient feedback for the audience. When there is a lot of back-and-forth discussion you will turn this off, but you should mute yourself when listening to an instructor.

Use Zoom's chat function - You can send a question or statement to everyone or privately to a participant.

Think about your actions on camera - Always remember that everyone can see you. Someone is watching as you take a big, wide mouth yawn, stretch, or wander around the room. These exaggerated movements are distracting to the audience and can be disruptive to the speaker. Try to stay still and be attentive.
