
GRANDE PRAIRIE REGIONAL COLLEGE
DEPARTMENT OF SCIENCE AND TECHNOLOGY
2003/2004

CHEMISTRY 1020: Introductory University Chemistry II

PREREQUISITE: CH1010 or equivalent

TRANSFER CREDITS: CH1020 to U. of Alberta CHEM 102, 3 credits
CH1010/1020 to U. of Calgary CHEM 201/203, 6 credits

INSTRUCTORS: A3 Les Rawluk Office J214 539-2738
B3 Barry Ramaswamy Office J218 539-2072

TEXT BOOK: *CHEMISTRY 6th Edition*
Steven S. Zumdahl and Susan A. Zumdahl
Houghton Mifflin Company ©2003

EMAIL: bramaswamy@gprc.ab.ca lrawluk@gprc.ab.ca

LABORATORY: Introductory University Chemistry II (Chem 102 and 105), University of Alberta, 2003/2004

Lab coats and **safety glasses** are **compulsory**, and are available at the Bookstore.

A Laboratory Breakage Deposit of \$30 per Chemistry course must be paid to the Cashier (Room C315), and the receipt must be shown to the Laboratory Technician (Mrs. Omana Pillay) during the first Laboratory class. (If the Laboratory Breakage Deposit has been paid in CH1010, it is not necessary to place a new deposit.)

SEMINAR: Seminars consist of problem solving, discussion of lecture materials, and a brief introduction to the upcoming Laboratory experiment. A short quiz will be part of most seminars.

COURSE EVALUATION

February Midterm	18%
March Midterm	18%
Final Exam	37%
Quizzes	5%
Laboratory Reports	12%
Laboratory Exam	10%

Assignments will be distributed on a weekly basis. Answers and complete solutions will be available for the student in both hardcopy and electronic format. Completion of assignments is strongly recommended to succeed in the course.

Attendance to all lectures and seminars is strongly recommended. Laboratory attendance to each specific experiment is compulsory; a passing grade in the laboratory component is required to pass the course. A doctor's medical note is required for **all** excused absences!

Students must obtain an overall average of 50% or better to pass the course. Students are encouraged to participate in class discussions, and help is available outside the classroom. **Appointments are not necessary.**

According to GPRC policy (see page 36 of the 2003/2004 calendar), a repeat final examination will not be granted in this course.

CH1020 COURSE CONTENT

A: Chemical Kinetics	Chapter 12	Pages 555–606
A.1 Reaction rates		
A.2 Rate laws		
A.3 Determining rate law form		
A.4 Integrated rate law		
A.5 Arrhenius equation		
A.6 Reaction mechanisms		
A.7 Catalysis		
B: Chemical Equilibrium	Chapter 13	Pages 609–651
B.1 Equilibrium condition		
B.2 Mass-action expression and the equilibrium constant		
B.3 Heterogeneous equilibria		
B.4 Applications of the equilibrium constant		
B.5 Le Châtelier's Principle		
C: Acids and Bases	Chapters 14 and 15	Pages 653–751
C.1 The nature of acids and bases		
C.2 Acid strength and the pH scale		
C.3 Calculating the pH of strong/weak acids		
C.4 Bases		
C.5 Salts		
C.6 Mixtures of weak acids and bases		
C.7 Effect of structure upon acid strength		
C.8 Common ion effect		
C.9 Buffer systems		
C.10 Acid/base titrations		
C.10 Acid/base indicators		
D: Solubility Equilibria	Chapter 15	Pages 751–781
D.1 Slightly soluble salts		
D.2 Complex ion equilibria		
E: Thermochemistry	Chapter 6	Pages 241–287
E.1 Types of energy; work and heat; First Law of Thermodynamics		
E.2 Enthalpy–endothermic and exothermic processes		
E.3 Calorimetry		
E.4 Hess's Law		
E.5 Standard enthalpy of formation		
F: Thermodynamics	Chapter 16	Pages 783–825
F.1 Entropy and the Second Law of Thermodynamics		
F.2 Entropy of the system and the surroundings		
F.3 Free energy		
F.4 Free energy and equilibrium		
G: Electrochemistry	Chapter 17	Pages 827–875
G.1 Redox reactions and standard electrode potentials		
G.2 Galvanic cells and spontaneous redox reactions		
G.3 Cell potential, electrical work, and free energy		
G.4 Dependence on concentration—the Nernst equation		
G.5 Electrolytic cells		
H: Transition Elements and Coordination Compounds	Chapter 21	Pages 985–1017
H.1 Properties of the transition metals		
H.2 Coordination compounds		
H.3 Structure of coordination compounds		
H.4 Crystal field theory
