CALENDAR STATEMENT: *5 (0-6s-3) in 7 weeks

Within the context of primary health care, the focus shifts to restoration, rehabilitation and support of clients experiencing chronic and less acute variances in health. Discussion related to health promotion and disease prevention continues. Intermediate health assessment and nursing skills are introduced. Prerequisites: NURS 194, NURS 195.

COURSE DESCRIPTION: The goal of this course is to continue development of concepts of health, health promotion, professional nursing, and human responses across the lifespan. The focus shifts to acute care of individuals within families and support of clients in the community experiencing chronic and less acute variances in health, through the process of CBL.

OBJECTIVES:

1. Discuss issues related to the delivery of health care in Canada and their implications for nurses (multidisciplinary collaboration, principles of the implementation of the Canada Health Act, privatization, continuity of care, midwifery, choices and options for care, chronicity, illness, pain management, loss).
 - 1.1 Discuss reproductive technologies, ethics of screening and testing, individual versus public good, politics of health care delivery, everyday ethics, inter-cultural ethics
 - 1.2 Discuss political ethics and reproductive issues, political action, representation and political power
2. Discuss roles and functions of professional nurses in restoration, rehabilitation and support.
 - 2.1 apply knowledge of caring relationships and therapeutic communication
 - 2.2 demonstrate professional attitudes and values (interdisciplinary collaboration, partnering with clients, receptivity to change)
 - 2.3 apply legal and ethical principles and standards in selected nursing situations (code of ethics, nursing practice standards)
3. Organize nursing knowledge according to selected models and theories
 - 3.1 nursing models and related frameworks (Watson Model of Human Care, Rubin framework, Calgary Family Assessment Model, Calgary Family Intervention Model)
 - 3.2 models and theories from other disciplines (lifestyle change and change, stress, coping, loss, grief, chronic illness, death and dying).
4. Discuss the impact of biological, psychological, spiritual, sociological, cultural factors on the human response with chronic and less acute variations in health across the lifespan.
 - 4.1 Physiology Apply the knowledge from the disciplines of: musculoskeletal, endocrine, reproductive, cardiovascular, neurovascular, gastrointestinal
 - 4.2 Anatomy
 - 4.3 Medical Microbiology
[bacteria, viruses, and fungi, gastrointestinal infection, blood infection, CNS infection, post-op infection, immunization (toxoids, vaccines), post-partum infections]
 - 4.4 Apply knowledge of nutrition, pathophysiology and pharmacology
5. Apply knowledge of growth and development of the newborn/infant/childbearing family
6. Demonstrate effective learning skills in self-directed, context-based, small group learning (skills in communication, group dynamics, critical thinking).
7. At a beginning level, appraises published research studies relevant to scenarios.
8. Demonstrate competence in using additional information technology to support scholarly activity.

COURSE EVALUATION

In order to pass Nursing 2900 (ie: receive a stanine of 4) it necessary that all of the following assignments be completed. Failure to complete and submit an assignment will result in receiving a mark of zero for that assignment. Please refer to the attachment which provides an explanation of the nine point system used for grading.

ITEM	VALUE
1. Assignment #1: Triple Jump	15%
2. Assignment #2: Scholarly Paper	30%
3. Tutorial Evaluation of Behaviors in CBL	20%
4. Pre-Scenario Quizzes	15%
5. Final Exam	20%
6. OSCE	Pass or Fail

1. OSCE (pass/fail)

OSCEs will be tested twice this semester:

OSCE # 1 October 4th, 2002
OSCE # 2 October 18th, 2002

Osces which are tested will be chosen by the lab instructors.

*****In order to receive a passing grade (stanine of 4) in the course, OSCEs must be passed (criterion for a passing grade for each OSCE is individualized. Please see the Lab Manual for Grading Criterion.*****

2. Written Paper (30%)

Students are to write a 1500-2000 word scholarly paper according to APA format. The due date

for the paper is October 12th at 1600hrs. See paper marking criteria.

Due Date for Paper: October 7th, 2002

Purpose: The student will gain a greater understanding of Watson's theory, *Nursing: The philosophy and science of caring*

(4)

Activity:

- Discuss the origin and development of the Watson's theory.
- Describe and analyze the four metaparadigm concepts of the model.
- Discuss how this model can be applied to an area of nursing practice as described in the course description, referring to at least three research articles to support the discussion.

Assignment Policy:

It is expected that **ALL** assignments are completed in order to pass a course.

All assignments are expected to be passed in at the time and place they are due. Extensions on assignments may be granted and must be negotiated with the instructor prior to the due date and with a date specified for late submissions.

A penalty of 5% for each working day that an assignment is submitted after the due date will be deducted from the final mark. For example, a paper scored at 75% would receive an adjusted grade of 70% if handed in one day late. Late assignments are due by 1600 hours and must be verified (stamped with date and time) by Nursing Office personnel.

- **Final Exam (20%)**

The final exam will be comprised of multiple choice, short and long answer questions. Questions will arise from math calculations (must have math calculation study modules completed), pharmacology, medical terminology, pathophysiology, lab, general nursing and information presented during Nursing Fixed Resources

The exam is scheduled for Oct. 21, 2001.

- **Triple Jump (15%)**

The focus of the learning issue is any topic deemed a **priority** for nursing practice; that is, interacting with clients with chronic, less acute and short term variations in health. Students will engage in individual brainstorming and will be asked to identify a critical question to research. It should be noted that scenarios for the triple jump may contain new disease processes/pathology. The triple jump worksheet with instructions will be given at the time of writing.

Triple Jump: September 25th, 2002

- **Tutorial Evaluation(20%)**

Students will be required to submit daily self evaluations as well as complete a daily peer-evaluation. A formative self-evaluation at midpoint in the course and a summative self-evaluation at the end of the course will be completed and submitted to the tutor (see attached forms:

For each student the tutor will consider input from the individual and peers to arrive at the

final grade. Attendance at CBL tutorials is expected; absence will jeopardize successful completion of the course and your tutorial mark.

Breakdown of Tutorial Mark:

Group Process;	5%
Presentation of Content	5%
Self-Direction	5%
Peer Evaluation	5%
Total	20% of final grade

Final Tutorial Evaluation October 16th, 2002

• **Pre-tests (15%)**

The purpose of the pretest is to ensure students have a basic and common understanding of the content and concepts at the beginning of the scenario. This will facilitate group discussion and critical thinking related to the content. Quizzes will be given after the brainstorming and before presentation of material on the Mondays. Quizzes will not be take home exams.

Withdrawal Date:

As our semesters run on two 7 week courses, the withdrawal deadline for NS 2900 with permission, is Friday, October 4, 2002. Students who drop a course after this date will receive a WF on their transcript.
