NURSING 3910 Course Outline

NUR 3910 Nursing Practice V *7 (/1 14) (either term, 0-3s-28c in 7 weeks). Practice focuses on restoration, rehabilitation and support (including health promotion and disease prevention) of clients experiencing more acute variances in health across the life span. Practice occurs in primary, secondary and tertiary level acute care or home care settings.

Prerequisites: NURS 2910, 2940, 2950.

COURSE HOURS:

Lecture/Seminar: 21 Lab/Clinical: 196

Drop date deadline: March 28/2003

COURSE DESCRIPTION:

Opportunities will be provided for students to develop advanced skills in health assessment, intervention and communication with clients across the life span. The focus of this clinical course will be the client and their families with more acute variances in health. Students will continue to incorporate health promotion, and all levels of prevention in nursing practice. Nursing practice over a continuous block of time will occur in various acute care settings.

COURSE OBJECTIVES:

Upon completion of Nursing 3910 the nursing student will be able to:

1. Analyse nursing knowledge as well as knowledge from other disciplines (research, models and theories) related to biological, psychological, sociological, cultural and spiritual factors in nursing practice with clients experiencing more acute variances in health.
2. Demonstrate application of legal and ethical standards in a variety of nursing practice settings by:
 - support of colleagues
 - decision making
 - protecting clients' values, beliefs and rights within the mandate and the role of the professional association.
3. Demonstrate professional behavior in nursing practice:
 - respect
 - communication
 - integrity

3

- responsibility
 - accountability
 - self-awareness
 - self-performance appraisal
4. With guidance, assumes primary responsibility for attaining and maintaining competence in nursing practice.
 5. Analyse concepts related to health promotion, primary, secondary and tertiary prevention, with clients and families with increased complexity and more acute variances in health:
 - demonstrate safe nursing care for 2-3 clients.
 - coordinate client care using sound clinical judgement, critical thinking and innovation with increasing independence.
 - effectively uses time management strategies.
 - demonstrate competence in mobilizing power structures, demonstrating beginning competence in dealing with diversity and ambiguity.
 - assist clients with decision making.
 - practices according to policies and procedures of clinical agencies.
 6. Demonstrate competence in ability to interact with and develop collaborative partnerships with clients, community members, interdisciplinary members and registered nurses:
 - valuing
 - respect of autonomy
 - commitment to caring
 7. Demonstrates competence in selected skills required for nursing care of clients experiencing acute and complex variances in health.

Attendance:

Attendance and participation is expected of all students in all seminars and labs. *Absence from clinical experience of more than 2 days may jeopardize successful completion of the course requirements.*

Students are expected to be punctual during their clinical experience in the agency.

Absences:

Attendance and participation is expected of all students in all seminars, labs, and clinical days. Students are asked to discuss the absence with the instructor to determine the most appropriate way to make up missed seminar, labs and clinical days. If you must be absent from a scheduled activity in the clinical agency, the student must contact the agency directly and also inform the instructor. **If a student misses his/her off unit experience day(s), due to illness it is their responsibility to make arrangements to make up that day.**

Professional Dress:

Students are expected to abide by the dress code of the particular agency. It is expected all **students will wear a Grande Prairie Regional College name tag** at all times, including in clinical areas you may be observing in (OR, RR, PAC).

Preparation for clinical experience:

It is expected that you will prepare for each clinical day by researching procedures, medical conditions, medications, surgical procedures, etc. Required psychomotor skills may also need to be reviewed prior to clinical experience. Students should be prepared to discuss their patient plan of care (including the patient priority needs, nursing diagnosis, medication profiles, any patient teaching plan, etc.) with the instructor during clinical time. If a student is not adequately prepared for clinical, the instructor may request the student leave the clinical agency. This would be a decision made after considering patient safety. Students must demonstrate safe, ethical nursing practice.

Late Assignments:

The late assignment policy applies. *A penalty of 5% for each working day an assignment is submitted after the due date will be deducted from the final mark. For example, a paper scored at 75% would receive an adjusted grade of 70% if handed in one day late.* Assignments must be verified, stamped with date and time received by nursing office personnel.

REQUIRED LEARNING EXPERIENCES:**Course Hours:**

| | |
|--------------------------|-----------|
| Seminar | 21 hour |
| Clinical/Orientation/Lab | 196 hours |

- ⊙ The instructor, in consultation with the Chair, may immediately deny assignment of a student to, withdraw a student from, or vary terms or conditions or a site of a practicum/clinical placement, if the instructor has reasonable grounds to believe that this is necessary in order to protect public interest.
- ⊙ All assignments must be completed to receive credit in the course.

NURSING PRACTICE

Nursing practice will be evaluated by means of the following:

1. **Direct Clinical Observation (DCO)** **Value: 50%**

A formative and written summative evaluation of Nursing Practice will be completed by the student, instructor and preceptor (if applicable).

Students MUST pass the DCO in order to pass the course. If a student receives a rating of "1" in any listed behaviour or category on the DCO, the student will not receive a passing grade on the DCO. If a student does not pass the DCO with a 50% they will obtain an overall grade of no greater than "3" on the nine point scale in the course.

This will be accomplished through observation assessment and evaluation of the student during clinical practice. Final grades will be assigned by the instructor and will be supplemented with input from preceptors or the staff of an agency or nursing unit. Tutors are directed to refer to the current DCO document from the Evaluation Strategies Committee.

A. Essential:

Over the seven weeks, students will have a continuous experience in an acute or home care setting with adults or children which will include:

1. Use of a nursing model to guide nursing practice with clients and families experiencing increased complexity and more acute variances in health.
2. Setting priorities and coordinating safe nursing care for a minimum of 2-3 clients.
3. Collaborating with clients, families, nurses, community members and members of other disciplines.

Students are expected to implement previously learned nursing skills.

2. Assignments:

SURGERY (4 NORTH)

A. Perioperative Follow-through

Value: 30%

Students will be expected to follow one patient through the pre-operative assessment clinic to the operating room, recovery room and back to the ward. The purpose of this assignment is for the students to gain an understanding of the perioperative experience and the issues that may arise throughout a patient's hospital stay.

The perioperative follow through is a chance for students to understand the process of surgery from beginning to end. Perioperative experience is the planned process of systematic, integrated nursing interventions carried out by a variety of nursing disciplines. Each aspect of the surgical experience affects the patient and his/her family. This nursing process is a way of looking at nursing and brings in critical thinking that guide nursing action. This process focuses on the patient and guides the nurse to develop nursing intervention to meet patient needs.

- **Paper cannot exceed 10-12 pages in length**
- **Paper is due one week after perioperative follow-through (by 1600 on the Friday)**
- **Assignments that are late will be docked 5% per day off the paper grade (example: 80% on paper, handed in 1 day late, final mark 75%)**

B. Critical Incident Journal

Value: 15%

Identifying critical incidents as a student in nursing education facilitates the integration of theory and practice. It can assist the student to foster reflective practice and personal and professional development. Critical incidences and reflection allows the students to increase their own knowledge of practice. Students will be required to examine three incidences that occurred in NS 3910. The student will examine the incident and identify key elements and issues both within the incident itself and in relation to their own attitudes and actions.

The guidelines for each journal entry are as follows:

1. Describe a significant event/incident that has occurred. Write a few paragraphs describing the incident (i.e. what you or someone else did in an intervention, communication). Be specific (detailed) and objective as possible. Include your thoughts, feelings and perceptions.

2. Reflect on the event/incident. Describe why this event was important to you and what factors influenced your/someone else's decisions/actions/feelings (such as assessments, previously learned experiences, values, beliefs, stereotypes or biases).
3. Evaluate your strengths and areas needing improvement in this situation. Explain why you thought those areas were strong or needed improvement.
4. Describe your significant learning. What would you do differently/investigate/maintain a similar incident should occur? Describe what you would teach someone else (peer/colleague) about this incident in order to improve your nursing practice. Provide nursing literature/valid resources that supports your conclusions.

Due dates for critical incidences:

#1: March 14/2003

#2: March 28/2003

#3: April 11/2003

- Journals **MUST** be handed in by 1600 on the day they are due. Missing or late submissions will be subject to a 5% penalty for each day they are late.
- Critical incidences should be between 5-8 pages typed. Attach the references as per APA format at the end of each journal.
- Remember to keep all entries confidential (i.e. not including real names of patients and staff)
- The marking guide for the critical incidences is attached.

****Reminder that this is not a logbook to account for what happened on each shift.****

C. Learning Plan

Value: 5%

A learning plan is the agreement between the student and the instructor specifying what the student intends to learn during the clinical experience and how this will be accomplished, the time frame for meeting the objectives and the methods by which achievement of the objectives will be measured.

The learning plan is intended to enable the students to work through steps of assessing, planning, implementing and evaluating the learning process. The steps of this process are:

- to provide the student with an opportunity to make an individual learning goal within the framework of the course objectives, BUT does not repeat the course objectives.
- Allows the student to determine learning objectives in view of their own perception of their strengths and areas for improvement
- identify strategies for meeting these goals
- identify a timeline to meet the goals
- identify an evaluation strategy to meet these goals

Students are required to submit at least 3 learning goals, with evidence to support how the goals in the learning plan will be met. Students will develop a learning plan to explore personal learning objectives compatible with the experiences of this course.

Due Date: March 14/2003

Students will follow up their learning plan at **Mid-term Evaluations March 26 or 27/2003** to evaluate their learning goals. A Mid-term Self-Evaluation must be completed.

Students must complete a final review of their learning plan at **Final Evaluations April 17/2003** indicating whether the goals were achieved. Students must provide evidence on how they achieved these goals. A Final Self-Evaluation must be completed.

SUMMARY OF EVALUATION FOR SURGERY (4 NORTH)

| | | |
|----|------------------------------|-----|
| 1. | Direct Clinical Observation | 50% |
| 2. | Perioperative Follow-through | 30% |
| 3. | Critical Incident Journal | 15% |
| 4. | Learning Plan | 5% |

HOME CARE ASSIGNMENTS

A. Field Notes

Value: 5%

Field notes are to be completed each day, collated weekly and reviewed with preceptor. A form is provided for your use. These notes include the client's initials, diagnosis, location of visit, procedures done and whether you were supervised.

B. Journals

Value: 40%

Journals will have two components:

1. Client Research

It is expected that you will prepare for each day by researching diagnoses and reviewing psychomotor skills. Review each client chart and research the condition, the identified problems and concerns, medications and treatments and required charting. **In the weekly journal, one client profile must be included.** The fifth journal should have a profile expanded to a **comprehensive care plan** with 2-3 nursing diagnoses and a review of the steps of the nursing process.

2. Critical Incidents/Reflection

Identifying critical incidents facilitates the integration of theory and practice. It can assist the student to foster reflective practice and personal and professional development. Students are required to reflect on their practice **weekly** in Nursing 3910.

Guidelines for Journaling: (5-6 typed pages minimum)

- i. Describe a significant event that has occurred and describe what you or someone else did as an intervention, communication, etc. Be specific and give detail and be objective. Include your thoughts, feelings and perceptions.
- ii. Reflect on the event/incident. Why was it important to you and what influenced your decisions, actions or feelings?
- iii. Evaluate your personal and professional strengths and areas needing improvement.
- iv. Describe significant learning for you. Would you do anything differently? What would you teach a peer/colleague about this incident to improve nursing practice?

- v. Provide evidence of use of resource materials to support your conclusions. Use references as per APA guidelines.
- vi. All entries are **confidential**, so do not name clients or staff. The journals are between student and faculty member only.

Note: Journals are not logbooks or totals of each day's events.

C. Learning Plan

Value: 5%

A learning plan is the agreement between the student and the instructor specifying what the student intends to learn during the clinical experience and how this will be accomplished, the time frame for meeting the objectives and the methods by which achievement of the objectives will be measured.

The learning plan is intended to enable the students to work through steps of assessing, planning, implementing and evaluating the learning process. The steps of this process are:

- A. to provide the student with an opportunity to make an individual learning goal within the framework of the course objectives, BUT does not repeat the course objectives.
- B. Allows the student to determine learning objectives in view of their own perception of their strengths and areas for improvement
- C. identify strategies for meeting these goals
- D. identify a time line to meet the goals
- E. identify an evaluation strategy to meet these goals

Students are required to submit at least 3 learning goals, with evidence to support how the goals in the learning plan will be met. Students will develop a learning plan to explore personal learning objectives compatible with the experiences of this course.

Due Date: March 14/2003

Students will follow up their learning plan at **Mid-term Evaluations the week of March 24-28/2003** to evaluate their learning goals. A Mid-term Self-Evaluation must be completed by the student.

Students must complete a final review of their learning plan at **Final Evaluations by April 17/2003** indicating whether the goals were achieved. Students must provide evidence on how they achieved these goals. A Final Self-Evaluation must be completed by the student.

SUMMARY OF EVALUATION CRITERIA FOR HOME CARE:

- | | |
|--------------------------------|-----------------------------------|
| 1. Direct Clinical Observation | 50% |
| 2. Journals | 35% - Due Weekly |
| a. Comprehensive care plan | 5% - Due April 11 /2003 |
| 3. Learning Plan | 5% - Due with first journal entry |
| 4. Field Notes | 5% - Due weekly |
