## Course Description

### OA 2511 Medical Terminology (3-0-0) 45 hours

This course provides you with a background in medical terminology. It will assist you to recognize medical words by identifying Greek and Latin prefixes and suffixes. Students will also learn root words and combining forms. It will assist you to correctly pronounce medical terms and to recall and interpret medical abbreviations. An introduction to the structure and function of anatomy, organs and body systems will also be introduced.

## Course Objectives

*Upon successful completion of this course, the student will be able to:*

1. Discuss four parts to medical terms
2. Describe root words and combining forms
3. Identify common medical terms and abbreviations
4. Identify documents found in a patients chart or medical record
5. Discuss the organization of the body in terms of cells, tissues, organs and systems
6. List the major organs found in the twelve organ systems
7. List body cavities and their contents

8. Discuss medical terminology, vocabulary, pathology, diagnostic and therapeutic medical terms related to each system: Integumentary, musculoskeletal, endocrine, cardiovascular, respiratory, digestive, urinary, lymphatic and hematic, reproductive, and nervous systems
